Abstract:	Let P be a closed convex cone in $\mathbb{R}d$ which is spanning, i.e., $P-P=\mathbb{R}d$ and pointed, i.e., $P \cap -P = \{0\}$. Let $\alpha := \{\alpha x\}_{x \in P}$ be an E0 -semigroup over P and let E be the product system associated to α . We show that there exists a bijective correspondence between the units of α and the units of E .
