Title:	Quantum Imaging of a Polarisation Sensitive Phase Pattern with Hyper-entangled Photons
Authors:	Kaur, Manpreet (/jspui/browse?type=author&value=Kaur%2C+Manpreet)
Keywords:	Quantum Imaging Polarisation Sensitive Hyper-entangled
Issue Date:	2022
Publisher:	Optica Publishing Group
Citation:	Optics InfoBase Conference Papers, JW4A.34.
Abstract:	A photon of entangled photons pair interacts with a transparent phase pattern that introduces position dependent shift in polarisation state of photon. A coincidence imaging camera, incorporating measurement outcomes of non-interacting photon generates quantum image.
Description:	Only IISER Mohali authors are available in the record.
