Keywords:	Synthesis 5-endo-dig cyclization Cu-catalyzed hydride and 2-naphthols
Issue Date:	2017
Publisher:	Wiley
Citation:	Asian Journal of Organic Chemistry, 6(12)
Abstract:	A Cu-catalyzed protocol for the synthesis of indolizine-containing diaryl- and triarylmethane derivatives through a 5-endo-dig cyclization of 2-(2-enynyl)pyridines, followed by a remote addition of nucleophiles, such as hydride and 2-naphthols, is described.
Description:	Only IISERM authors are available in the record.
