Title:	Analytic Theory of Polarization Transfer in Multi-spin Systems
Authors:	Lakshmi Bhai, N.V. (/jspui/browse?type=author&value=Lakshmi+Bhai%2C+N.V.)
Keywords:	Chemistry NMR Nuclear Magnetic Resonance Quantum Chemistry
Issue Date:	31-Aug-2016
Publisher:	IISER-M
Abstract:	Understanding the mechanism of polarization transfer in NMR spectroscopy is an active area of research both from an experimental as well as theoretical perspective. In this regard, an analytic theory based on the reduced density matrix formalism is proposed to develop models for quantifying the polarization transfer among spins in the solid-state. We believe that the analytic results could be quite helpful in quantifying the polarization transfer in band-selective and relayed polarization experiments in solid-state NMR.
