Keywords:	Pyridinophanes Acceptor atoms
Issue Date:	2018
Publisher:	Royal Society of Chemistry
Citation:	Chemical Communications, 54(64), pp. 8857-8860
Abstract:	The first examples of group 13 element containing pyridinophanes have been assembled using heteroatom N-E-N bridges (E = B, Al). The presence of B and Al as acceptor atoms in the bridges and their coordination with pyridine nitrogen has a very strong influence on the conformational rigidity of the pyridinophanes.
